TIPS FOR A PERFECT OUTDOOR GARDEN CHESS BOARD

1. Ideally garden blocks of 50x50cm should be used, though 40x40cm will also be sufficient.
2. The minimum area for the board should be four square meters. An outside border where onlookers can stand a view will be a plus.
3. A board can also be painted on existing paving – especially if bright colours need to be introduced in a recreation or public area.
4. Alternatives to using only garden blocks or paving can be the use of grass “blocks” and pebbles/gravel/other ground cover plants – a feature that could make any outdoor space unique for entertaining and playing chess. A garden bench or two may add the perfect finishing touch around a chess board and turn the space into a uniquely structured area.
5. We also supply MINI Garden sets for smaller areas and patio’s. Please enquire.

TECHNICAL SPECIFICATIONS OF THE CHESS PIECES

- The pieces are made of plastic, hollow moulded and each piece has two parts bottom and top that screws together.
- All the bottoms of pieces are the same size, radius of about 25cm, height of the King is 65cm and the other pieces smaller in line with the Staunton Style.
- Pieces are packed in two boxes with dimensions 70x70x60cm, but can also be transported loose (in e.g. black plastic bags) to fit into an ordinary sedan car.
- Altogether the pieces weigh about 30kg.
